All the Emoji

by CodenameCarrot

Summary

As of April 2016, The database that stores works on A03 does not allow emoji. If you try to add an emoji it will end your story there. Any words after the emoji? Poof. Gone. This is a known, if poorly advertised, issue with the archive.

There are some workarounds; you can find them in: How to Make iOS Text messages on A03. But here? Here is for ALL THE EMOJI*.

10 chapters of emoji tables, each with the HTML for putting the emoji into your work and the CSS for putting it into your workskin. Copy-Paste baby. Copy-Paste.

*Does not contain the 2016 Unicode release. You'll have to come up with the code for pickle yourselves.

(Note, because this is 10 chapters of emoji tables, here is a link to the Index Tables (chapter 1) to speed up load times and reduce confusion if you have preferences set to "entire work.")
To use this reference you will need to use a custom workskin. First, create the workskin and add the following:

```css
#workskin .hide {
  display: none;
}
```

Then:

1. Scroll down until you locate the emoji you want. The emoji are divided into the following tables:
   - Emoticons, Faces, & Smiley
   - Hands & Body Parts
   - People & Emotions
   - Sports
   - Animal and Other Faces
   - Animals
   - Plants
   - Food & Drink
   - Mystical and Religious
   - The Sun, Moon, and Stars
   - Weather
   - Time, Time, Time
   - Hearts & Romance
   - Dressing Up
   - Celebrate!
   - Awards
   - Wealth
   - Places
   - Buildings
   - Furniture and Fixtures
   - Vehicles
   - Tools of Destruction the Trade
   - Science and Industry
   - Movies, Music, and Video Games
   - Reading, Writing, and Art
   - Geometric Shapes
   - Signage
   - Control Buttons
   - Arrows
   - Computer Icons
   - Symbols: Giant & Enclosed
   - Enclosed Kana and Ideographs

*"ALL THE EMOJI" does not include combined characters such as families, flags, or people with skin-tone modifiers.

2. Click on the header link to jump to the appropriate chapter/table
3. Check that your emoji is in general use. If a warning symbol is listed next to the unicode, this character will probably only show up for readers using Apple products and most mobile devices. It will rarely, if ever, show up in Windows.
4. Copy the CSS into your workskin, and the HTML into your work

ENJOY!

**Smileys**

| (Grinning Face With Smiling Eyes) | (Face With Tears Of Joy) | (Smiling Face With Open Mouth And Smiling Eyes) | (Smiling Face With Open Mouth And Cold Sweat) | (Smiling Face With Tightly-Closed Eyes) | (Winking Face) | (Smiling Face With Smiling Eyes) |

\( \text{U+1F621} \) Pouting Face

\( \text{U+1F620} \) Angry Face

\( \text{U+1F608} \) Smiling Face With Horns
People (Tables 2-4)

Chapter Summary

This chapter contains all of the emoji that can be modified using the Fitzpatrick scale for human skin tones. The tables here are modified to include a column noting which emoji can be modified.

Because emoji using the Fitzpatrick scale will only display correctly on Apple and most mobile devices, they are not included here, and their implementation is left as an exercise for the reader. (Alternately, leave a comment and I can reply with the appropriate HTML and CSS.)

### Hands & Body Parts

Chapter End Notes

Flags are not included here. Flags are another combined character emoji, and I'll get to them when I have time. Also, most - if not all - flags will only display correctly on Apple and most mobile devices.

Works inspired by this one, Codename: Night Heron by MathClassWarfare
